

Part 1: Get code from GitHub to your machine

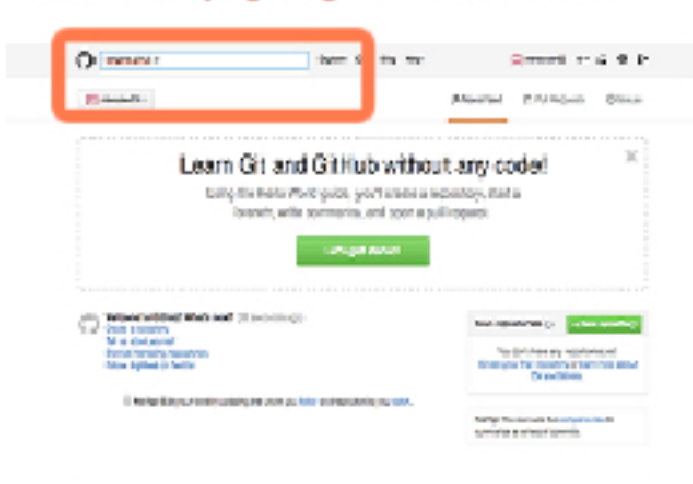

Go to github.com and Sign up.

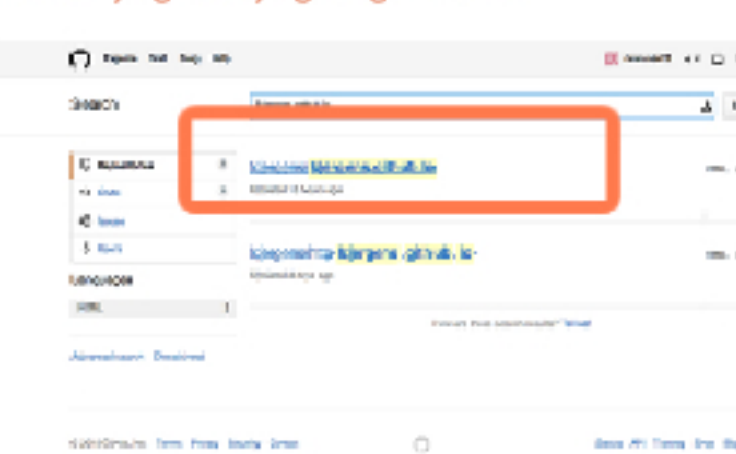

Fill out the form then Finish sign up.

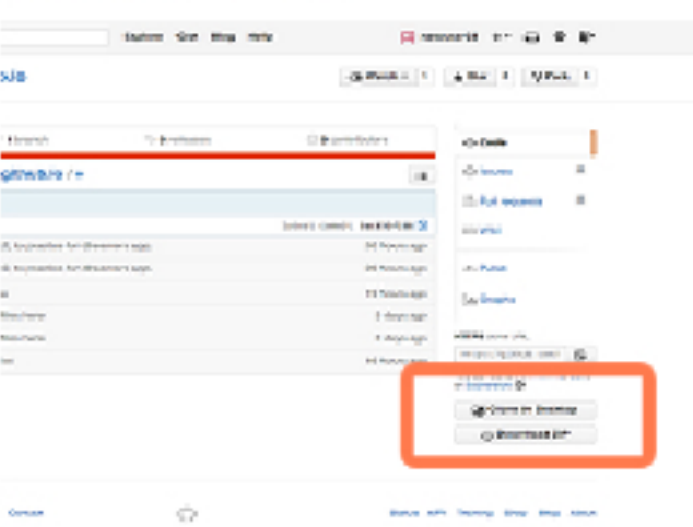

Search for kjergens.github.io Hit Enter.

Select kjergens/kjergens.github.io.

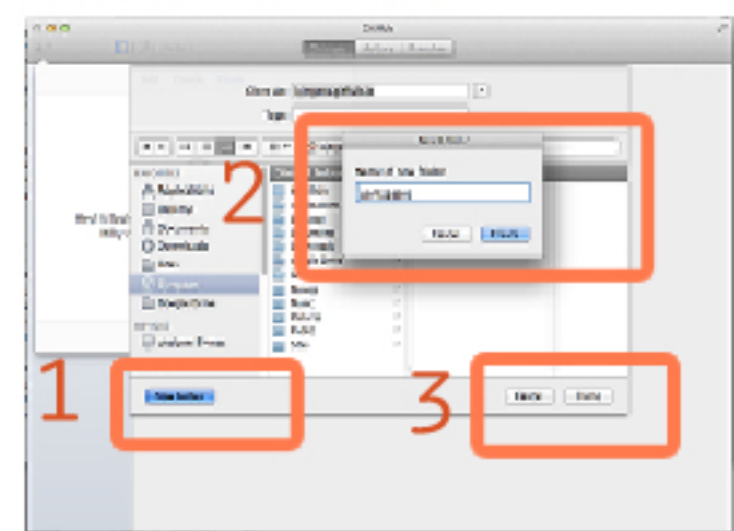

Select Clone in Desktop.

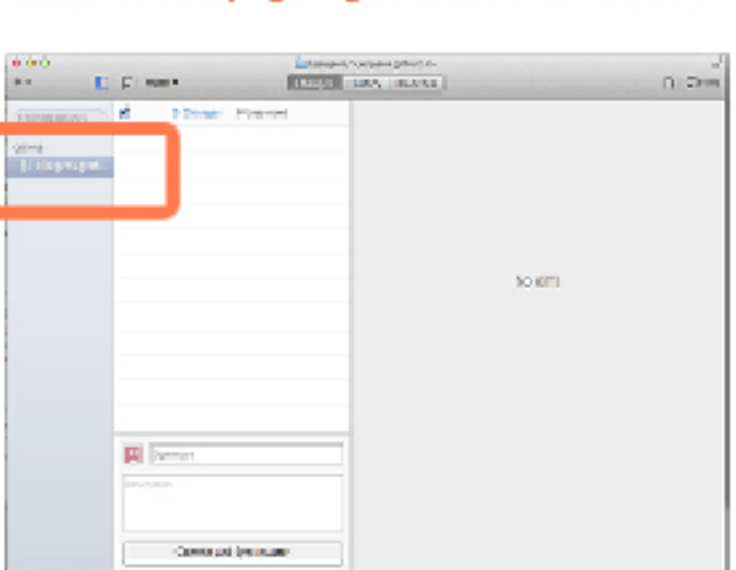

Download GitHub. (Your screen might look different if you don't have a Mac.)

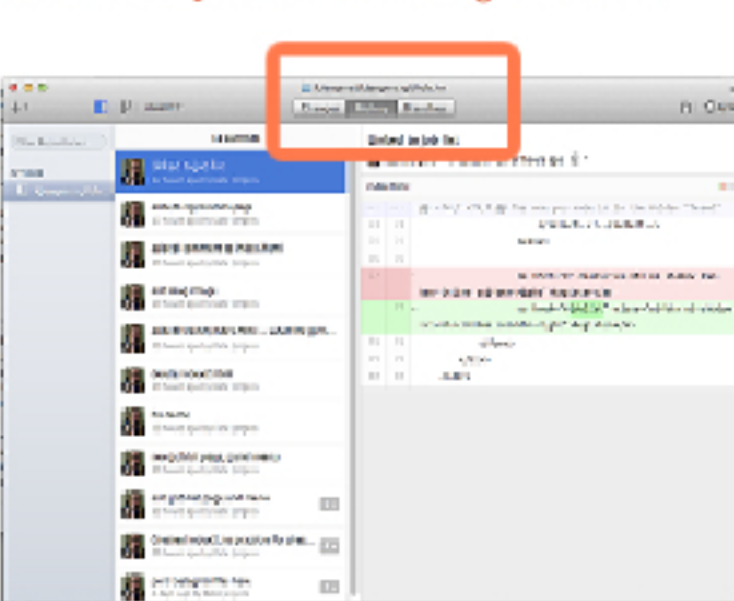

Select "New Folder", call it workspaces, select Create. Select "Clone".

Done! See the kjergens.github.io in the side menu.

Select History to see all the changes we made.

Open workspaces/kjergens.github.io in Explorer. All the code is there!
